

TIRE SELECTION DEVICE

TSD is a portable user friendly and fast standard quality tool that allows to select similar tires before any test

> Product purpose

Standard quality tool

Tread compound qualification and classification before use and tests.

Control of tire tread homogeneity

TSD allows a fast, easy and simple control of tire tread, and is based on physical criteria (modulus and loss coefficient of the elastomer).

> Strengths

Fast

Less than 1 minute per tire.

Easy

Handy device used directly on a mounted and inflated tire.
Easily transportable.

Simple

Operator guidance for basics operations.
Non destructive tests for tires.

Pairing tires before use

TSD shows through a graph, the best pairing to do within a set of tires.

Basics

Standard quality tool to control tire tread homogeneity and optimize tire pairing.

> Our customers

Tire manufacturers, Car makers
Testing centers, Racing team

The TSD identify out of range tires and selects the most homogeneous tires within a set, key instrument in a quality approach of tire testing.
