

# ROLLING RESISTANCE

*Rolling resistance measurement and analysis according to UNECE R 117 labelling standards and results analysis*

## > Service purpose

### Measures

Rolling resistance measurement for C1 and C2 tires.  
Tests performed according to UNECE R 117 labelling standards.

### Analysis report

Results are analyzed and described by our expert team in a report.

## > Strengths

### 100% controlled test environment

E2TC (European Tire Test Center) is an indoor tests center especially created by Dufournier to perform tires 365 days a year and for labelling tests.

### High performance machine

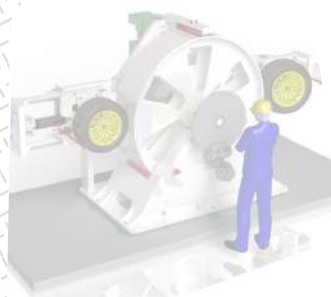

Rolling resistance machine especially designed by Dufournier for rolling resistance measurement.

### Tire improvement

Upon request, Dufournier conduct a study to improve labelling results.

## > Our customers

Tire manufacturers, car makers  
Certification authorities

Measure tire rolling resistance for labelling.
